

What is Talk to Me?

Talk to me is an application built for iPad and iPhone to facilitate brief, sentence based, one-directional basic information in multiple languages other than English.

The app focusses on key areas of daily routine communication with a preliminary focus on elderly Culturally and Linguistically Diverse (CaLD) patients in sub-acute settings.

Please note that Talk to me does NOT replace the vital role of an interpreter. An interpreter should always be engaged to communicate the important points in the continuum of patient care.

How do I download the app?

The app is available on the Apple store. Search for Talk to Me (Datacom) and look for the image to the right:

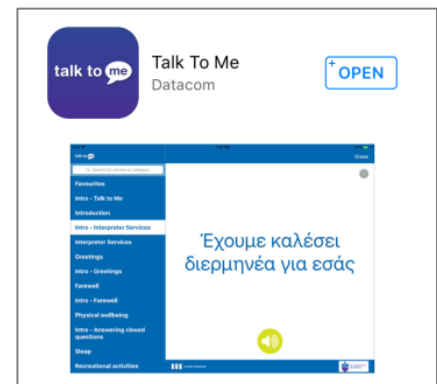

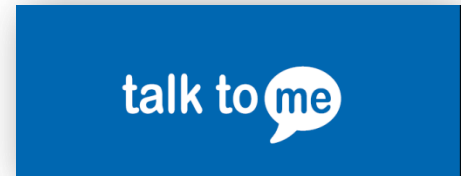

OR use the following link:

<http://apple.co/2i5HYPC>

Login: stvincents

Main features
