When do we see you?

We see you when you think something is wrong with your mental health

OR

when someone else is worried about your mental health.

Why do we see you?

To work out if you have mental health problems.

Mental health problems can change how you feel, think or behave

What will happen?

We talk to you.

We may come and see you

OR

We may talk to you on the phone or computer

We will ask you-

Where you want to see us.

If you would like anyone else to be there.

If you would like an interpreter.

Who we can talk to about you.

Who we can write to about you.

We may talk to your family or people who support you, and we may talk to other people who know you

We may look at your medical records.

When we have finished we will tell you what we think.

Then we write a letter.

The letter says what we think will help you feel better.

The letter says how people can help you.

If you want, we will come back another day and talk to you about what the letter says,

and talk to the people who support you about what the letter says.

You can ask to see and read the letter

There is no cost.
