Setting up the bathboard

Your bathboard will need to be installed by a family member/friend or an equipment company. Your Occupational Therapist will show your carer how to do this if required.

1. Make sure there is a lip of 4-5cm or more on both edges of the bath.
2. Place the bathboard across the bath so the board sits on both edges. Tighten the clamps underneath to secure.
3. Where possible, the bathboard should be placed under the stream of water and where it is easy to reach the taps.

Getting in the bath

1. Ensure the bathboard is secure.
2. Back up to the bathboard until you can feel the back of your legs against the edge of the bath.
3. Reach back for the board with both hands and sit down on the bathboard.

4. Shuffle/move your bottom back on the bathboard while supporting yourself with your arms.

5. Lift both legs into the bath while leaning back slightly and supporting yourself with your arms.
