

Internship

The Internship Program at St Vincent's Hospital Melbourne is designed to train and support you as a new doctor transitioning into clinical practice.

We will provide you with varied clinical experience to assist in your future career progression, as well as ensuring you successfully complete all requirements to obtain General Registration.

Our organisation provides a comprehensive 3-day orientation program for Interns, where you'll benefit from practical upskilling sessions and a shadow shift with a near-peer to ensure a smooth transition to Internship. The support offered to you during your Internship year continues well past orientation, with our structured mentoring program and our highly engaged Medical Education Team.

St Vincent's Hospital Melbourne is proud to offer an First Nations Internship Program for all applicants of Aboriginal and Torres Strait Islander origin. This unique and exciting program is part of our commitment to reconciliation with our First Nations community.

We'll help set you up for success and provide you with a breadth of knowledge with weekly education sessions tailor-made for interns, including practical sessions in our state-of-the-art simulation lab.

As one of our valued Interns you will be encouraged to take an active role in hospital governance through the Junior Medical Staff Reference Group and other forums, where your experience and contributions will be highly appreciated. You'll also have the opportunity for individualised career advice if you desire, via our routine exit interviews at the conclusion of your Intern year.

Choosing to undertake your Intern year at St Vincent's Hospital Melbourne is a choice to join a supportive and experienced training environment with a strong track record and high staff retention rates. In fact, over 90% of Interns return to work with us for PGY2. At St Vincent's Hospital Melbourne we see our junior doctors as an integral part of current medical care, and as future medical leaders.
