Healthy Ageing Service

Secondary Consultation for General Practice

St Vincent's Hospital has expanded its community aged mental health program into Banyule, Nillumbik, Whittlesea, Mitchell and Murrindindi (still incl. Boroondara).

The Healthy Ageing Service is focused on prevention and early intervention. We aim to support General Practitioners in their work by providing mental health advice and care to older adults who have mild to moderate symptoms, or are at risk of developing symptoms.

We are a multi-disciplinary team funded to provide expert mental health assessment and brief intervention to older adults living in their own home or in residential care. Alternatively they can attend our office in Kew East, or we can attend your clinic for a joint consultation.

We also offer secondary consultation with our medical staff during business hours.
To book a secondary consultation, please call or email us:
