Janssen-Cilag Fellowship

CLINICAL TRAINING PROGRAMS IN MENTAL HEALTH

**ST VINCENT'S MENTAL HEALTH SERVICE AND
THE UNIVERSITY OF MELBOURNE**

A clinical training program in mental health for psychiatrists in Asia conducted collaboratively by two leading teaching institutions in Australia.

Janssen-Cilag Fellowship

COURSES AVAILABLE

One-month advanced training Fellowship in psychiatric specialties is available through the POST Program for the following courses.

- Community Psychiatry
- Geriatric Psychiatry
- Cognitive Neuropsychiatry
- Rehabilitation Psychiatry
- Early Psychosis and Youth Health
- Substance Abuse and Addiction Psychiatry
- Affective Disorders and Psychopharmacology
- Consultation Liaison Psychiatry
- Psychotherapy
- Child Psychiatry

TRAINING DATES

There will be four intakes for the training year beginning February, and closing dates for application are generally a month prior to the start of each term. The one-month placements are arranged within each intake term. There is a limited number for each intake depending on the type of course. Other subspecialties may be available but need to be individually negotiated.

COMPONENTS OF TRAINING

Goals of Training

The goals of training for the psychiatrist includes the following:

- to develop advanced knowledge and skills in a subspecialty of clinical psychiatry that can be applied to the local psychiatric practice in the trainee's country.
- to develop individual and institutional capacity for further education and training .

Structure of Training

The training program is organised by St. Vincent's Mental Health Service in collaboration with the Department of Psychiatry, University of Melbourne. During the one-month placement, trainees have access to a formal academic program designed to match the trainees' requirement and needs.

Supervisor/Consultant

Appropriate consultants will be allocated to provide supervision and professional support for clinical or research work. Trainees can learn directly from experienced psychiatrists, academics and opinion leaders in psychiatry.

Evaluation Report

Regular meetings and supervision are scheduled with the trainees to review the goals and progress of the training. A certificate of completion is provided to all trainees who successfully complete the course.

Professional development and research

Trainees are also encouraged to plan a work or research project on quality improvement in the area of clinical work, education or training that would enhance the practice of psychiatry in their local institutions.

CONTENTS OF TRAINING

Trainees will have access to an individualised formal academic and training program, which is clearly set out during the proposed training period. This may include: clinical training under supervision, individual supervision, clinical site visits, tutorials, journal club, departmental seminars/ lectures, case conferences, organisational aspects of service structure and function, access to mental health policies and key documents, management/staff support meetings, academic and research meetings.

SELECTION CRITERIA

All psychiatrists from the Asian region who have completed formal postgraduate training in psychiatry are eligible to apply to the program and must meet the following criteria:

- that they have a satisfactory record of clinical competency and professional standards.
- that the primary aim is to advance their knowledge and skills that will contribute to the practice of psychiatry in their home countries.
- that they have outstanding qualities and potential to become the next generation of opinion leaders in psychiatry.
- that the trainees have adequate fluency in spoken and written English to benefit from their training experience.
